

## Meet the Class of 2020-2021 GSH Residents

Rebecca Kim was born and raised in the Seattle area (Go Hawks!). She received both her Bachelor of Science in Public Health and Doctorate of Pharmacy from the University of Washington. Her current interests in pharmacy are oncology and pediatrics/NICU. She enjoys playing tennis and recently picked up golf again! She enjoys going to cafes and reading all the Yelp reviews of restaurants before she visits them. During the quarantine, she learned how to make strawberry chiffon cake and pizza dough from scratch! She is on a lifelong quest to develop her green thumb.

Hailee Williams grew up in rural Southeast Idaho and attended Idaho State University for both Pharmacy School and her undergraduate studies. She is interested in learning more about the pharmacist's role in Emergency Medicine and the Intensive Care Unit, but mostly she loves working alongside other health professionals in a collaborative setting. When Hailee has downtime, she loves to spend it with her dog Button, who is a "dorkie," both in breed and temperament. She also enjoys playing games, watching movies, or reading - especially Lord of the Rings!

David Worthington grew up in a small Nevada mining town called Gabbs. He is a 2020 graduate of Roseman University College of Pharmacy in Las Vegas and completed his undergraduate education at University of Nevada, Reno. David worked for 9 years in pharmaceutical safety testing in Reno before switching careers. His current pharmacy interests include critical care and infectious disease. In his free time, he enjoys exploring new areas with his family, playing guitar, and continuing his unending search for the next great dad joke.
