

WEAR A MASK. KEEP IT ON.

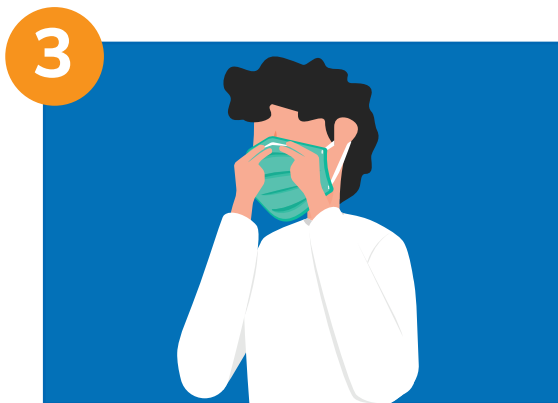

If you have been asked to wear a mask, please keep it on for the entire visit.

Top part of the mask has a bendable edge that can be molded around your nose. Make sure the white side is facing toward your face.

Loop the mask around your ears.

Adjust the mask's nose piece. Pinch the bendable portion around your nose.

Adjust the mask to cover your face and mouth. The bottom edge should fit under your chin.

Don't forget to keep your mask on for everyone's safety.
