

# 'STACHING' THROUGH THE SNOW

As winter is here and folks might be wearing more facial hair than normal. We support individuals expressing their facial hair; however, we want to ensure that you are able to maintain a proper seal for your N95.

**Make sure you have a green check and your good to GO!**

Make sure your facial hair does not interfere with your ability to establish a seal with your fit tested N95 respirator.

Remember to use a CAPR/PAPR if you are unable establish a seal with N95 respirator in your department
